ABOUT ME

Bachelor's graduate in Data Science with first-class honors. Strong practical and analytical skills developed through academic projects, internships, and hands-on experience with Python, SQL, and Machine Learning. Seeking to advance knowledge in Data Science & Machine Learning and contribute to innovative research.

EDUCATION AND TRAINING

Bachelor of Technology in Computer Science and Engineering (Data Science)

Gandhi Institute of Technology and Management (GITAM Deemed to be University) [30/06/2021 – 30/04/2025]

City: Hyderabad | **Country:** India | **Website:** https://www.gitam.edu/ | **Field(s) of study:** Computer Science and Engineering (Data Science)

SKILLS

Programming & Scripting

Python / NumPy / Pandas / Seaborn / Scikit-learn / R / Java / SQL

Data Science & Machine Learning

Machine Learning / Neural Networks / Exploratory Data Analysis (EDA) / Data Preprocessing / Deep Learning / Statistical Analysis

Database and Tools

MySQL / PostgreSQL / pgAdmin4 / Power BI / GitHub / Git / Matplotlib / VS Code / Jupyter Notebook

WORK EXPERIENCE

CSRBOX (IBM SkillBuild Program) – Hyderabad, India

Data Analytics Intern

[24/06/2024 – 05/08/2024]

- Served as SPOC for a five-member team, coordinating tasks and ensuring smooth project delivery.
- Analyzed gender inequality datasets across multiple countries; performed data cleaning, preprocessing, and visualization using Python (Pandas, Matplotlib, Seaborn).
- Developed data storytelling and mentor-guided reports aligned with UN SDGs, turning analysis into insights.

Exel Rubber Limited – Hyderabad, India

Data Analytics Intern

[20/05/2024 – 20/08/2024]

- Worked on "Integrated Revenue and Customer Dynamics Analysis" project, generating actionable business insights from proprietary datasets.
- Built interactive Power BI dashboards and performed SQL querying (PostgreSQL) to track operational KPIs and sales performance.
- Delivered reports and insights under guidance, demonstrating applied analytics in real-world business scenarios.

PROJECTS

[01/09/2024 – 01/04/2025]

Semantic Segmentation of Self-Driving Cars Using Deep Learning and Computer Vision (Thesis)

- Implemented pixel-wise classification of road elements (vehicles, pedestrians, lanes, traffic signs) using DeepLabV3 with transfer learning, atrous convolutions, and ASPP.
- Preprocessed and augmented the CamVid dataset; evaluated model performance using IoU and pixel accuracy metrics.
- Addressed real-world constraints such as low-light conditions, occlusions, and computational efficiency for autonomous driving systems.

Breast Cancer Detection Using CNN (Academic Project)

- Built a CNN model to classify breast cancer images with 87% accuracy on 2,000+ samples.
- Applied data preprocessing to reduce noise and improve precision.
- Evaluated performance using confusion matrix, ROC curve, and F1 score.

[05/01/2026 – 02/02/2026]

Bankruptcy Prediction Neural Network (Independent Project)

- Built a neural network from scratch to predict company bankruptcy.
- Addressed severe class imbalance using **SMOTE** and **mini-batch gradient descent**.
- Demonstrates **advanced machine learning, Python skills, and real-world problem-solving**.
- Tools: Python, NumPy, Pandas, Scikit-learn.
