SUMMARY

Data Science graduate with hands-on SQL, Python, and Excel experience across three project-based internships, seeking a data-focused role to build dashboards, apply machine learning, and drive business and analytical insights.

SKILLS

Programming: Python, R, SQL, Table Joins, Aggregate Functions, Pandas, NumPy

Data Infrastructure and Engineering: Data Pipelining, ETL, MySQL, PostgreSQL

Visualization and BI Tools: Power BI, Excel (Dashboard Reporting)

Analytics: Statistical Analysis, KPI Analysis, Exploratory Data Analysis

EXPERIENCE

Data Analytics Intern
CSRBOX (IBM SkillBuild) – Python, SQL

Jun 2024 – Aug 2024
Remote, Flexible Hours

- Analyzed structured datasets using Python and SQL across multiple learning modules, applying data cleaning and validation techniques to fix inconsistencies.
- Built visualizations supporting UN Sustainable Development Goals reporting, translating raw datasets into clear, actionable insights within the IBM SkillBuild Program.

Data Analytics Intern
EXEL RUBBER LIMITED – Power BI, MySQL, SQL

May 2024 – July 2024
Hyderabad, Onsite

- Cleaned and transformed business datasets using SQL and Excel, improving reporting accuracy across operational and sales performance tracking for internship deliverables.
- Designed 2 Power BI dashboards and queried MySQL using SQL across multiple reporting tasks, supporting business analysis and decision-making.

Python Programming Intern
OASIS INFOBYTE – Python, API

Mar 2024 – Apr 2024
Remote

- Built 3 Python applications (BMI Calculator, Password Generator, Weather App), achieving over 95% functional accuracy through structured testing.
- Integrated OpenWeather API for real-time data extraction, validating functionality across 5+ cities to strengthen automation and testing fundamentals.

ADDITIONAL EXPERIENCE

Academic Tutor (Self-Employed)

Apr 2025 – Present | Hyderabad

Provide academic tutoring to school students while independently building SQL, Python, and data analytics skills.

PROJECTS

Data Quality & Business KPI Monitoring System
Python, SQL, Power BI

- Built KPI monitoring pipeline in Python, SQL, and Excel, validating 1,230 transactions against 5 data quality checks and achieving a 62% overall compliance score.
- Designed Power BI dashboard with anomaly detection, flagging 21.8% failure impact and ₹452K in revenue for stakeholder reporting and business analysis.

Additional Independent Projects

2025–2026

- Built and published 4+ SQL, Python, and Power BI projects on GitHub, including exploratory data analysis and business intelligence dashboards.

CERTIFICATIONS

• Oracle Agentic AI Foundations Associate	In Progress, 2026
• SQL (Intermediate) – HackerRank	2026
• Data Analytics Job Simulation – Deloitte Forage	2026
• Azure Fundamentals Cloud Computing – Infosys Springboard	2026
• Machine Learning with Python – IBM	2025

EDUCATION

Bachelor of Technology in Computer Science and Engineering (Data Science)
Gandhi Institute of Technology and Management (GITAM), Hyderabad

2021 – 2025
CGPA: 7.58/10
